

# Indiana's Opioid Crisis

*How the opioid epidemic has continued to impact the people of Indiana*

## STATE FACTS

**1,857 DEATHS**

were attributed to opioid overdoses between January 2020 and January 2021.<sup>1</sup>

**A 41.7% INCREASE**

in opioid overdose deaths was reported between January 2019 and January 2021.<sup>2</sup>

**65.8 OPIOID**

**PRESCRIPTIONS** were written for every 100 persons in Indiana in 2018.<sup>3</sup>

**\$3,895 PER CAPITA**

was spent on fatal and nonfatal opioid use disorder overdoses in 2017 - 24.2% more than the national rate.<sup>4</sup>

## NATIONAL DATA

**3.75 MILLION**

or 9.2% of patients go on to long-term opioid use after a low-risk surgery (e.g. inguinal hernia repair, knee arthroscopy.)<sup>5</sup>

**80 PILLS**

is the average amount of opioids that patients receive after orthopedic surgery whether they need them or not.<sup>6</sup>

**Rx**

**9.7 MILLION**

people misused prescription pain relievers in 2019.<sup>7</sup>

**OVER 95,000 DEATHS**

from a drug-related overdose were reported in one year's time ending in January 2021. This is the highest number of overdose deaths ever recorded in a 12-month period.<sup>8</sup>

**OVER 71,000 PEOPLE**

died of an opioid overdose between January 2020 and 2021 — **44.3% more** people than the estimated number of motor-vehicle fatalities in 2020.<sup>9,10</sup>
