

Dear Members of the 119<sup>th</sup> Congress,

On behalf of the patients, providers, families, and health professionals our 94 organizations represent, we urge you to pass the Alternatives to Prevent Addiction in the Nation (Alternatives to PAIN) Act (H.R. 1227/S. 475) to prevent unnecessary exposure to opioids and ensure access to the wide array of FDA-approved, safe, and effective non-opioid pain management approaches for America's seniors.

Congress has already taken an important step in expanding access to non-opioid treatments through the Non-Opioids Prevent Addiction in the Nation (NOPAIN) Act, which was signed into law as part of the 2023 omnibus spending agreement and took effect January 1, 2025. This law covers outpatient surgical procedures covered by Medicare Part B and, as a result, would do little to prevent health insurance plans from steering seniors with a Medicare Part D plan towards lowest cost care options, which are often generic prescription opioids.

Our country's seniors are not immune to the worsening opioid epidemic, with overdose deaths among seniors soaring by more than 60 percent in the last decade.<sup>i</sup> In 2022, more than 1 million seniors were diagnosed with an opioid use disorder,<sup>ii</sup> and more than 50,000 seniors suffered an opioid overdose from prescription opioids, illicit opioids, or both.<sup>iii</sup> In fact, despite a 40 percent nationwide decrease in opioid prescribing over the last decade, opioid prescribing in Medicare increased by 75 percent during that time.<sup>iv</sup>

We urge Congress to ensure that non-opioid therapies are just as accessible to seniors as opioid-based medications. The Alternatives to PAIN Act would do this by establishing patient cost-sharing no greater than generic tier for Medicare Part D beneficiaries receiving non-opioid pain relief. The legislation would also prohibit utilizing step therapy and prior authorization for non-opioid pain management drugs for Medicare Part D beneficiaries.

Further, the opioid epidemic is estimated to cost U.S. taxpayers \$1.5 trillion annually.<sup>v</sup> A Health Management Associates report found that in 2022 alone, opioid use disorder cost the Medicare program \$33 billion.<sup>vi</sup> Congress can cut that cost and save lives by updating Medicare Part D and passing the Alternatives to PAIN Act, which will prevent addiction by increasing access to non-addictive pain management approaches.

With opioid overdose death rates continuing to climb, Congress must remain vigilant in fighting this crisis. Seniors deserve choices when managing their pain or recovering from surgery. In order to prevent addiction and save lives, we urge Congress to pass the Alternatives to PAIN Act.

Together, we can prevent opioid addiction before it starts and, in the process, save lives. We look forward to working with you to enact this important legislation.

Sincerely,

Voices for Non-Opioid Choices
