

NON-OPIOID DRUG PIPELINE

VOICES FOR NON-OPIOID CHOICES

The opioid epidemic continues to drive a national public health crisis, underscoring the urgent need for effective, non-opioid pain management. With several non-opioid drugs in development, expanding access to these treatments is crucial to providing safe pain relief and stopping addiction before it begins.

THE OPIOID CRISIS IN AMERICA

133 Americans died every day from an opioid-related drug overdose between April 2024 and April 2025.

In 2024, **7.6 million** people misused prescription opioids - **20,820 people daily**.

As many as **90%** of surgical patients in the U.S. receive an opioid prescription.

The Joint Economic Committee estimates that the U.S. spends approximately **\$1.5 trillion** annually on the opioid epidemic.
